PERSONAL SKILLS AND COMPETENCIES

During the different working experiences - in particular at financial institutions of primary importance - I have gained experiences and abilities of project management, technical and functional analysis, development and management of processes, databases and software applications of various functional and technological nature through activities of organization, planning, design, programming, testing, documentation, operation and maintenance, with application development in typical languages of the banking world such as COBOL, SQL and JCL. In addition to the professional knowledge gained in the computer field must be included the personal skills related to the Natural Sciences in general and the astronomical disciplines in particular, not forgetting the so-called "frontier researches" for which I am considered, as independent scholar, a serious and reliable person. I have then an excellent general culture, especially in the historical and scientific fields.

RELATIONAL COMPETENCIES AND SKILLS

RUSSIAN

base elements
base elements
base elements
base elements

I am considered a serious person, concrete, pleasant, of good character and good presence, positive, tolerant, sociable and helpful, particularly brought to the work of teams and to share with others my knowledge; equipped with an open mind, very flexible and adaptable to the news, I am naturally attracted by every opportunity for professional and cultural growth, facilitated in this by considerable abilities for fast learning.

ORGANIZATIONAL SKILLS AND COMPETENCES

In addition to the positive professional experiences over the years also in the coordination of the activities of the working groups formed by more people (particularly in Deutsche Bank, Fidelity and UGIS), was certainly worthy of note my activity in Bollate as city secretary, municipal councilman and leader board for a local political group in the period 1989-1993, as well as the one carried out in the context of Civil Protection and Voluntary Ecological Guard (GEV) and Voluntary Forest Fire Protection (VAB) in the Regional Park of the Groane between 1984 and 2011; in the latter context, in addition to the various field activities centered on environmental education, prevention and repression with power of sanction, in quality of public official, of administrative offenses provided by the decree of appointment to GEV, the many fire fighting actions and the experience gained in operating room in coordination and in radio communications in emergency situations, I attended several courses and training, in particular:

- 13-20-24/03/2002 – 1st Formation and training course in the field of Civil Protection organized by the Groane Park and the Province di Milan;
- 06/05/2003 – 2nd Formation course for volunteers of Municipal Civil Protection Groups (D.G.R. 02/07/1999 - no.6/44003), organized within the meaning of Regional Regulation no.3 of 08/06/2001;
- 06-07-08/06/2003 – Course for employees in A.I.B. (Woodland Fire Fighting) on Techniques of Stalling and Forest Fire Fighting held in Curno (BG) and organized by the Autonomous Province of Trento, by the Fire Fighting and Civil Protection Service and by the Provincial Fire Fighting School of Trento, with release of the certificate of attendance in date 11/06/2003.

ARTISTIC SKILLS AND COMPETENCIES

Excellent expressive capacity both in oral and written form. In the course of the years, in addition to having published several articles on some magazines at national distribution level within the framework of so-called "researches of frontier" and having covered the role of spokesman in a couple of conferences, I also wrote and published a historical novel freely available on the Internet ("**LA VERDE GUERRA DI PAPÀ - Diario di un Figlio della Lupa vissuto a Taranto nei duri anni della Seconda Guerra Mondiale**") that stands for "**THE GREEN WAR OF DAD – DiarY of a Son of the She-Wolf who lived in Taranto in the difficult years of the Second World War**", verdeguerra.fabiosiciliano.it) and buyable for Kindle on Amazon, I finally maintain a blog (fabiosiciliano.wordpress.com), where I deal mainly about the themes of my researches. In addition, at the times of the high school and university I was part of a couple of not professionals pop musical groups, where I had the role of singer and guitarist of accompaniment.

OTHER SKILLS AND COMPETENCES

In addition to the technical skills acquired in the mainframe world (MVS, TSO, COBOL, CICS, DB2 and of course SQL and JCL, as well as some experiences on DL/1, IMS and VSAM), **I have a solid knowledge and familiarity in PC**, in particular as regards different operating systems (DOS, OS/2, Windows and some experience with some LINUX distributions), languages and relational databases (BASIC, C, Clarion, DBIII, HTML, XHTML, PHP, Javascript, CSS), office applications (Access, Excel, Powerpoint and Word as regards Microsoft, as well as the corresponding approach, 123, Freelance and WordPro in Lotus Smartsuite and Base, Calc, Impress and Writer in Open Office), security tools (Norton Internet Security), photo retouching (Jasc and Corel PaintShop Pro), **development of web sites (CMS Joomla! and WordPress:** see for example cooperativagioele.it, lucioabarile.com) and miscellaneous utility for features more varied in the management of the system and in the treatment of documents. Furthermore, both for personal passion and professional reasons, I code habitually in **VBA, Liberty BASIC** and, more restrictively, **BCX** and **C**.

**OTHER INFORMATION WORTHY OF
NOTE**

Convinced animalist as valiant defender of the rights of the weakest, in the course of the years I have adjusted every my behaviour consistent with this principle, observing accordingly a diet strictly vegetarian. I do not smoke and I have never made use of substances that even only potentially could damage my health or that of those who surround me. I believe in a healthy life founded on values of wellbeing, responsibility, freedom, legality, culture, sensitivity and civilization and I am opposed to any form of free violence and oppression toward any form of life, human and not. In addition to long voluntary activities in the field of civil protection and environmental held at the Park of Groane (1984-2011), in the past I also attended actions against hunting and poaching with the most important national and European associations for the defence of the animal rights. Passionate of flight in all its forms, I have long attended the Aeroclub of Bresso (MI) and I hope one day to be able to achieve the patent of private pilot.

**CONTRACTUAL
FRAMEWORK**

The preferred contractual framework, saved every other possible and different proposal still to be evaluated, including the eventual possibility of a long-time recruitment, is that of a professional relationship of **freelance consulting as a self-employed person without the constraints of subordination nor time**, with the imperative request of maximum punctuality and reliability in payments, with expiry thereof not later than 60 days from the date of invoice.

**GEOGRAPHICAL PREFERRED
AREA**

I am interested in serious proposals for **TELEWORKING** from home (*Smart Working*).

In addition to this, the preferred geographical area is that **around the territory of Saronno** and roughly **between Tradate, Monza and Milan**.

I am also interested in evaluating job offers in **Switzerland, Canton Ticino**.

I authorize the data processing pursuant to the Italian Law 196/03 and subsequent amendments.

Yours faithfully,

FABIO SICILIANO
